Name: Privacy Breach

Description: Dude...They just emailed my own password back to me (and it wasn't even asterisked)

Don't they know that's a severe breach of privacy!!! Offenders leaked them in PlainText.

I hope they lie at the bottom of the deepest pits of hell

Can you tell me their domain name??

Difficulty: Medium

Author: Revak Pandkar

Writeup:

Googling a bit about the list of sites that email us our password back in the plain text format we get to know about a site called Plain Text Offenders

So going into the Offenders List we get the Git Hub link which directs to the list of sites

The question mentions them lying at the bottom

So, the answer is simply the domain at the end of the list
