CHALLENGE – My FOOLish Opponent
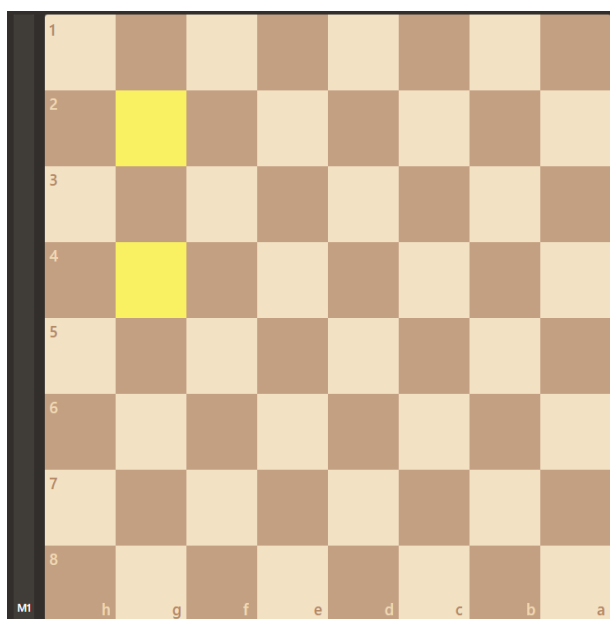

AUTHOR – Naman Chordia

MEDIUM- Easy

CATEGORY- OSINT

DESCRIPTION - I love to play blindfold chess and this game is one of my easiest win . It's been a long time since I played this game and now I forgot all moves.
Help me recall my game and mention all the moves we played in flag . (btw I was never good in blindfold games what I did was just played against low rated players)
The flag format is VishwaCTF{move1_move2_move3_.....all moves of my game)

 WRITE-UP

- **As you can see its a chess board and pieces are invisible , it can be concluded that white has played last move as pawn to g4 as it is highlighted.**
- **Here the engine is showing a mate in 1 to black (M1 is written there). One hint is given in the name of question "FOOL".**

- Its also mentioned that opponent is a low rated player and the game happened is one of the shortest game including g4 move of white followed by a mate in 1.
- All these parameters point towards the famous Fool's mate in chess which is : f3,e6,g4,Qh4#
- Thats it , this is the flag! : VishwaCTF{f3_e6_g4_Qh4#}
